Profile Summary

I am passionate full stack developer with a strong foundation in Java, Python and Artificial Intelligence. I enjoy solving complex problems using data structures and algorithms. Through academic project and self-learning. I have built practical experience and eager to contribute to impactful software solutions. I worked impactful projects like E-commerce website, E-Learning website for easy to learn new technologies. I thrive in coding clubs and team collaboration. Aiming to combine software engineering, machine learning, and analytical skills to develop efficient full-stack solutions that drive business success.

Education

- Bachelor of Technology in Computer Science and Engineering with AI and DS
Parul University
CGPA: 8.34
Vadodara, Gujarat
Expected Graduation: 2026
- **Relevant Coursework:** Data Structures and Algorithms in Java and Python (Intermediate), Machine Learning, Database Management System, Operating Systems, Computer Networks.

Technical Skills

Programing Languages: Java, Python, HTML, CSS, Javascript

Backend Technologies: Flask, RESTful APIs

Web Technologies: React.js, Tailwind, Node.js.

Database Technologies: MySQL, MongoDB (Fundamental), SQL.

Development Tools and Platforms: Git, VS Code, GitHub.

Concepts: Basics of Data Structures and Algorithms, Object-Oriented Programming (OOP).

Soft Skills

Communication, Team Collaboration, Problem Solving, Time Management, Adaptability.

Projects

Chess Game Project | GitHub

- Developed a browser - based chess game with full support for standard chess rules and piece movements. Used JavaScript for implementing game logic and managing player turns, and styled the interface with CSS for a clean and responsive layout.
- The project showcases strong skills in front-end development, DOM manipulation, and interactive UI design.
- **Tools Used:** HTML, CSS, JavaScript.
